

Omni Meadow Green Roof

Budgetary Comparison

Omni Meadow Green Roof is a vegetative roof assembly comprised of Omni Infinity Media & Omni Meadow Seeds. Omni Meadow creates the conditions for life to flourish and transforms into a robust landscape within 8 weeks after installation. It is used in lieu of a typical sedum extensive green roof for faster installation, easier hoisting & logistics, and greater biodiversity.

Budgetary Pricing per Square Foot

	Typical Extensive Green Roof	Omni Meadow Green Roof	
Growth Media			
• Materials	\$2.78	\$4.17	Omni is delivered 80% lighter than typical green roof soil
• Shipping	\$0.39	\$0.10	
Vegetation			
• Materials	\$4.25	\$0.10	Omni grows on-site to full coverage in 8 weeks
• Shipping	\$0.41	\$0.00	
Total	\$7.83	\$4.37	Omni saves >40% materials cost

Using Omni Meadow saves money:

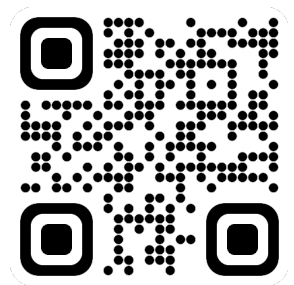

- significantly reduces labor for soil
- eliminates hoisting & labor for plants
- installs faster & easier

Product Descriptions

- **Omni Infinity Media** is a lightweight, high-porosity, biodiverse growth media used as the rooting substrate supporting plant growth. It is comprised of a lightweight mineral aggregate called **GEO** and top dressed with **BIO**, a complete soil ecosystem with life-supporting mineral, cellulosic, probiotic components including more than 1,500 microbial species.
- **Omni Meadow Seeds** are selected specifically to foster high plant biodiversity, rapid plant establishment, resilient plant communities, robust plant ecosystems, and beneficial wildlife & pollinator habitat.
